Terrorism: It's Your Problem Too

FBI Director Clarence Kelley's recent warning that terrorists may be among the celebrants at America's Bicentennial should be of serious concern to every innocent citizen. Kelley warns that such groups may be preparing to "blow out the candles" on what otherwise promises to be a memorable and fulfulling epoch in our nation's history.

"We have had utterances from some groups that they are going to disrupt the Bicentennial," said Kelley. "One such group, in their constitution, said they are going to kill me," he added.

Speaking at a Washington luncheon sponsored by the American Security Council, Kelley's main point, however, is that most citizens fail to take seriously enough the threat posed by terrorists to our society. That lack of perception persists, he adds, even as the carnage from terrorist acts in the U.S. mounts. Bombings from terrorist activity doubled in each of the past two years; going from 24 in 1973 to 45 in 1974 to 89 in in 1975. Such terrorist acts last year left 11 dead, 72 injured, and \$2.7 million worth of property damage.

"Still. I think to most Americans, the terrorist threat is a remote and abstract thing — a problem that commands little, if any, of their attention in their understandable preoccupation with problems more immediate in the every day business of living," says Kelley.

A key problem in educating Americans to the danger, he adds, is the too common public view of the terrorist as a haphabard, bearded bungler—rather than the deadly threat re really is. "Terrorists," says the Director, "are prepared to kill men, women and children to further whatever cause they claim to be pursuing. And the heinousness of these murders is accented by the fact that they murder without passion. They murder with cool deliberation and careful planning." Despite this reality, adds Kelley, "Incredibly, some otherwise law-abiding people provide moral and material support to terrorists...."

Kelley concedes that the FBI's success in identifying and bringing to justice perpetrators of terrorist acts is mixed at best. One problem is that the agency is not allowed to use electronic assists such as wiretaps to penetrate terrorist groups.

One obvious answer in aiding the FBI in our fight against terrorism is for Congress to pass legistation permitting the agency to use electronic surveillance in special circumstances. Beyond that, as the FBI chief emphasizes, individual citizens can heip out by prompty reporting information relating to terrorism and by "vigorously supporting the principle of rule by laws that has enabled our nation to flourish these 200 years?"

us in growing terrorism

By DAVID LAMB geles Times News Service WASHINGTON -FBI Dictor Clarence N. Kelley arned yesterday that ran-

dom terrorist attacks in the United States are growing at a record rate. He said radical groups may be planning to increase their level of violence

during the Bicentennial year.

Kelley, who called terrorism the ultimate evil in U.S. society, said the RBI had received intelligence reports regarding

the radicals' plans. Although hard evidence was lacking, he said the reports had to be taken seriously

"Some might think we are crying wolf," Kelley said. "That's entirely wrong . . . I am not saying that our nation is in imminent danger of being devastated by terrorists. But I do consider terrorism a very real and growing problem."

Bombings on the rise

He told luncheon guests at the American Security Council, a private organization of 150,000 members interested in defense and national security, that there were 24 terrorist bombings in the United States in 1973, 45 in 1974, and 89 last year.

Excluding the 11 persons killed in the still-unsolved ex-plosion at La Guardia Airport in New York City last month, terrorist acts of violence killed 11 persons in 1975, injured 72, caused \$2.7 million in

property:damage.

During the last five years, Kelley said, there have been 255 terrorist bombings in the United States, 122 firebombings, 45 sniping incidents, 120 terrorist shootings, 24 ambushes, and 21 arsons. At least 43 police officers have been killed and 152 wounded by terrorists in the same period, he rorists in the same period, he

Saying the FBI ctill did not know if the La Guardia blast was the work of a madman or was the work of a madman of a' revolutionary, Kelley told the Security Council that the chances of solving terrorist crimes are relatively small, largely because violencelargely because violence-prone revolutionaries are part

CLARENCE KELLEY "The ultimate evil"

of small, closely knit groups that are difficult to infiltrate.

Kelley, who stressed the importance of surveillance and intelligence work within the limits of law, said there is no evidence that any of the terrorist groups responsible for recent bombings were fi-nanced or controlled by for-

nanced or controlled by for-eign interests.

But, in an unrelated com-ment, he said the Soviet Union's intelligence gathering agency, the KGB, posed a sub-stantial threat. The Soviet bloc's diplomatic representa-tion in the United States has tripled in the decade to about 2,000, he said, and persons coming here from the Soviet coming here from the Soviet bloc number about 50,000 annually.

Kelley addresses news media at meeting sponsored by American Security Council

Attacks Terrorism More Public Concern

United Press International

FBI Director Clarence M. Kelley said yesterday that terrorism is the ultimate evil our society but few Americans seem concerned unless their lives are involved.

Terrorists killed 11 and injured 72 victims last year through 89 bombings and other violence, and the toll grows each year, Kelley said.

"I'm not saying that our nation is in inminent danger of being devastated by terrorists but I do consider terrorism a very real and growing problem. Selley tologa news media meeting sponsored by -American Security

Council, a military industrial lobby group.

And I-think it's vital that Americans involve themselves in the effort to stem terrorist acts before they reach crisis intensity," Kelley said.

"Still, I think to most Americans the terrorist threat is a remote and abstract thing...," he said, "But the families of those killed and "But the

maimed have perceived it."

Kelley said that while he was police chief in Kansas City, colleagues arrested a man who admitted he "was planning to bomb my home. Take my word for it, nothing can bring the evil of terrorism in perspective more quickly

for a person than to learn he is a target.'

He said law enforcement officers are frequent targets and 43 officials have been killed and 152 injured by terrorist violence,

"Incredibly, some otherwise law-abiding people provide moral and material support to terrorists, apparently for idealistic reasons," he said. The best that can be said about such people is that they are terribly. misguided.

"Make no mistake about it, the true terrorist is ...com-mitted to an extent that is difficult for rational people to comprehend," he said. "Theyare not political activists. They are criminals. And their number, seems growing."

52 Killed by Bombs. In 375, FBI Reports

United Press International

The FBI reported yesterday that bombings in the United States and Puerto Rico killed .52 persons during the first 11 months of 1975—more than double the toll for the same

period of 1974. The 1975 report showed there were 1,898 incidents, which, in addition to causing death, injured 262 persons and caused \$25 million in property ? demage. During same 1974 period 1,874 incidents killed 23 persons, injured 189, and caused \$8.6 million damage,

the FBI said. said leading The FBI cargets of the 1975 bombings, were residences, which were involved in 535 attacks commercial operations and office buildings, 446; vehicles 241; school facilities, 155, and law enforcement personne and facilities, 73.

MT. CLERIENS, MICH. MACOMB DAILY -- D. 52.354-DETROIT METROPOLITAN AREA

JAN 20 1976

Washington Report:

It's FBI vs. KGB and terrorists

By TOM OCHILTREE

Manax Washington Correspondent in WASHINGTON - Up until now all the pros and cons woiced about detente by members of Congress and presidential candidates largely have overlooked one worrying problem. The more relaxed relationship with the Soviet Union has placed a heavy security burden on the Federal Bureau of Investigation.

In macter of fact tones, FBI Director: Clarence M. Kelley startled a roomful of newsmen recently by discussing the dangers of spying and subversion.

HE POINTED out that the embassy staffs, trade delegations and cultural representatives from the Soviet bloc countries now total about 2,000 persons in the Washington area alone. The startling fact is that this figure has tripled in the past three years.

Additionally, about 50,000 from the Soviet dominated world visit the United

States each year. They are of all types - scientists, ballet dancers, sailors and just plain tourists.

To prevent espionage and subversion. the FBI is charged with keeping a watch on the more suspicious seeming of these

* Kelley said some of these people prea sumably are full time agents of the KGB; the Russian's dread secret police and spy apparatus. Others may be part-time agents or just report occasionally on things they have observed in the United States.

In any event, he explained, "a substantial threat exists in this area."

OCCASIONALLY a sensational story surfaces in the media reporting that KGB agents actually have penetrated the offices of senators and congressmen and the staffs of congressional committee.

Kelley threw down those stories. He

said the FBI "knows of no intrusions on Capitol Hill."

. While he avoided making the point specifically, his audience knew the additional burden on the FBI comes at a time and of microphones and other electronic dewhen congressional committees, in the name of protecting-theacivil liberties of Americans, continue to badger the agency for over-zealous activities in the past, including questionable use of wire-

Kelley insisted that the FBI is determined from now on to stay strictly within the law when it comes to the rights of citizens. He and Atty. Gen. Edward H. Levi are carrying on a continuous consultation designed to produce rules for the FBI which will accomplish. the difficult task both of protecting the freedoms all Americans cherish and safeguarding society from people seeking to destroy it.

HE SAID the FBI would like Congress to relax somewhat the severe restrictions which now make it extremely difficult for 'the agency to use one of its major tools - wiretapping and deployment vices to pick up conversations. Thus far there has been no response from Congress.

.. Kelley spoke at a luncheon organized . by the American Security Council, a private body, in Washington's Army and Navy Glub.

-Much of his speech was devoted to the growing world-wide threat of terrorism. Kelley reminded Americans that when they read about "the bloody atrocities in Northern Ireland, the Middle East and 'elsewhere' it would be well for them to reflect that "there has been strong evidence in the past couple of years that our own terrorist problem is growing." He cited these statistics:

"There were 89 bombings attributable to terrorists activity in our nation last year, as compared with 45 in 1974 and 24

"DURING THE past five years there have been 255 such bombings, 122 fire bombings, 45 sniping incidents, 120 shootings, 24 ambushes and 21 arsons."

American terrorists may be influenced by extreme radical political ideas from abroad but the FBI has not found proof that the groups here were being manipulated by the KGB or some other foreign. intelligence service, he said.

Kelley described terrorism as "the ultimate evil." Terrorists kill and maim' innocent men, women and children but their activities, in the long run, retard rather than advance political ideas in which terrorists believe. He had only contempt for people who support terror. ist activities of any kind.

Tom Ochiltree

"INCREDIBLY," he said, "some otherwise law-abiding people provide moral and material support to terrorists, apparently for idealistic reasons. The best that can be said about such people is that they are terribly misguided.

"Terrorists are not idealists. They are without principle. They have no regard for human life. They pervert the freedoms this nation bestows upon its citizens. They defile American traditions. They are not political activists. They are criminals and their numbers seem to be

Kelley: Not 'Crying

WASHINGTON (AP) — FBI Director Clarence Kelley said Tuesday he's not "crying wolf" when he warns of a serious threat of terroism in the United States in connection with the Bicentennial.

"It might be thought that we're crying wolf, but if you think that, you're entirely wrong," Kelley told a meeting sponsored by the American Security Council, a private organization.

Kelley noted that some radical groups have threatened violent acts and said the have threatened violent acts and said the FBI must take those threats seriously. But he added, "I do not have any hard facts, any hard evidence, to show that they will fullfil these threats."

Calling terrorism "the ultimate evil in our society" Kelley said that "no one can consider himself impune from terroristic.

consider himself immune from terroristic

the true terrorist ortrait

"...The true WASHINGTON terrorist is committed - committed to an extent that is difficult for rational people to comprehend. A perverted sort of courage and profound dedication sustains them. They are humorless, insensitive and they are influenced by no truths other than those they perceive to validate their cause."

FBI Director Clarence Kelley, in a recent speech, added that terrorists "are prepared to kill men, women and children to further whatever cause they claim to be pursuing. And the heinousness of these murders is accented by the fact that they murder without passion. They murder with cool deliberation and careful planning." Kelley said during his 35 years of law enforcement work he has met and talked with murderers "who have taken lives cruelly and viciously; hut nevertheless, most of them have moments of compassion and gentleness. The terrorist does not."

Kelley's point, made at a recent luncheon sponsored by the American Security Council, is that too many Americans havé an erroneous view of the revolutionary terrorist.

'I fear many people see them as a caricatured comical figure, a bearded, rumpled individual furtively clutching a round bomb with fuse sputtering," the FBI chief continued. "It would be folly to confuse this invention of some cartoonist's mind with the true revolutionary terrorist. He is not amusing. He is lethal. And Americans simply must realize

The Herald's Washington Correspondent

By LEE RODERICK

Kelley said that indifference or even assistance by third parties adds, to the already extreme difficulty of apprehending suspected terrorists. Incredibly, some otherwise lawabiding people provide moral and material support to terrorists, apparently for idealistic reasons...Terrorists are not idealists. They are without principle. They have no regard for human life. They pervert the freedoms this nation bestows upon its citizens...They are not political activists; they are criminals. And their numbers seem to be growing."

The Attorney General for California, Evelle Younger, whose state has been rocked by terrorist violence from such groups as the Symbionese Liberation Army (SLA) and the Charles Manson gang, made the same point in a U.S. Senate hearing in 1974. "...It is perfectly obvious that the SLA types wouldn't be at large today unless they were able to. locate and identify and take advantage of certain friendly acts," Younger testified before the Senate Internal Security Subcommittee on Sept. 23, 1974.
"In the old days," Younger con-

tinued, "John Dillinger or Pretty Boy Floyd had a limited number of people they could turn to for help when they were being sought by the authorities, but obviously, the situation today is

different. There is no other way to explain the success that some of the SLA people and others have had in avoiding capture over a long period of time."

Younger explained that the two essential needs of the urban guerrillaarms and money — are easily obtainable in the United States. "Weapons of every description are available on the open market," he said. "...Adequate financing is also easily obtainable. In addition to funds voluntarily given by friends and sympathizers, the American economy makes it simple for terrorists to obtain cash...the use of stolen or fraudulent cards credit cards is common.

These and other advantages terrorists in the U.S. have over many of their foreign counterparts have helped spur an alarming rise in domestic terrorism, according to Kelley. During 1975, there were 89 bombings attributable to terrorist activity in the U.S., compared to 45 in 1974 and 24 in 1973. Eleven persons were killed in such terrorist acts last year and another 72 were injured, said Kelley. Property damage totaled more than \$2.7 million.

"Still, I think to most Americans the terrorist threat is a remote and abstract thing—a problem that commands little, if any, of their attention in their understandable preoccupation with problems more immediate in the everyday business of living, said Kelley.

He emphasized that "it's vital that Americans involve themselves in the effort to stem terrorist acts before they reach crisis intensity."

FBI Director Clarence Kelley's recent warning that terrorists may be among the celebrants at America's Bicentennial should be of serious concern to every innocent citizen. Kelley warns that such groups may be preparing to "blow out the candles" on what otherwise promises to be a memorable and fulfilling epoch in our nation's history.

"We have had utterances from some groups that they are going to disrupt the Bicentennial," said Kelley. "One such group, in their constitution, said they are going to kill me," he added.

Speaking at a Washington luncheon sponsored by the American Security Council, Kelley's main point, however, is that most citizens fail to take seriously enough the threat posed by terrorists to our society. That lack of perception persists, he adds, even as the carnage from terrorist acts in the U. S. mounts. Bombings from terrorist activity doubled in each of the past two years; going from 24 in 1973 to 45 in 1974 to 89 in 1975. Such terrorist acts last year left 11 dead, 72 injured, and \$2.7 million worth of property damage.

"Still, I think to most Americans, the iterrorist threat is a remote and abstract thing - a problem that commands little, if any, of their attention in their understandable preoccupation with problems more immediate in the every day business of living says Kelley.

A key problem in educating Americans to the danger, he adds, is the too common public, view of the terrorist as a haphazard, bearded bungler - rather than the deadly threat he really is. "Terrorists," says the Director, "are prepared to kill men, women and children to further whatever cause they claim to be pursuing. And the heinousness of these murders is accented by the fact that they murder without passion. They murder with cool deliberation and careful planning." Despite this reality, adds Kelley, "Incredibly, some otherwise law-abiding people provide moral and material support to terrorists..."

. Kelley concedes that the FBI's success in identifying and bringing to justice perpetrators of terrorist acts is mixed at best. One problem is that the agency is not allowed to use electronic assists such as wiretaps to penetrate terrorist groups.

One obvious answer in aiding the FBI in our fight against terrorism is for Congress to pass. legislation permitting the agency to use electronic surveillance in special circumstances. Beyond that, as the FBI chief emphasizes, individual citizens can help out by:promptly reporting information relating to terrorism and by "vigorously supporting the principle of rule by laws that has enabled our nation to flourish these 200 years."

Speaking at a Washington luncheon sponsored by the American Security Council, Kelleys main point, however, if that most citizens fail to take seriously enough the threat posed by terrorists to our society. That lack of perception persists, he adds, even as the carnage from terrorist acts in the U.S. mounts. Bombings from terrorist activity doubled in each of the past two years; going from 24 in 1973 to 45 in 1974 to 89 in 1975. Such terrorist acts last year left 11 dead, 72 injured, and \$2.7 million worth of property damage.

"Still, I think to most Americans, the terrorist threat is a remote and abstract thing—a problem that commands little, if any, of their attention in their understandable preoccuption with problems more immediate in the every day business of living," says Kelley.

A key problem is educating Americans to the danger, headds, is the too common public view of the terrorist as a haphazard, bearded bungler—rather that the deadly threat he really is. "Terrorists," says the Director, "are prepared to kill men, women and children to further whatever cause they claim to be pursuing. And the heinousness of these murders is accented by the fact that they murder without passion. They murder with cool deliberation "incredibly, some otherwise law-abiding people provide moral and material support to terrorists...."

Kelley concedes that the FBI's success in indentifying and bringing to justice perpetrators of terrorist acts is mixed at best. One problem is that the agency is not allowed to use electronic assists such as wiretaps to penetrate terrorist groups.

One obvious answer in aiding the FBI in our fight against terrorism is for Congress to passilegislation permitting the agency to use electronic surveillance in special circumstances. Beyond that, as the FBI chief emphasizes, individual citizens can help out by promptly reporting information relating to terroism and by "vigorously supporting the principle of rule by laws that has enabled our nation to flourish these 200 years."

SIOUX CITY, IONA JOURNAL D. 74.000 S. 57,500

JAN 21 1976 644 Terrorists Slay with No Remorse

By Lee Roderick

WASHINGTON — "... The true terrorist is committed — committed to an extent that is difficult for rational people to comprehend. A perverted sort of courage and profound dedication sustains them. They are humorless, insensitive and they are influenced by no truths other than those they perceive to validate their cause."

FBI Director Clarence Kelley, in a speech, added that terrorists "are prepared to kill men, women and children to further whatever cause they claim to be pursuing. And the heinousness of these murders is accented by the fact that they murder without passion. They murder with cool deliberation and careful planning." Kelley said during his 35 years of law enforcement work he has met and talked with murderers "who have taken lives cruelly and viciously; but nevertheless, most of them have moments of compassion and gentleness. The terrorist does not."

Kelley's point, made at a recent luncheon sponsored by the American Security Council, is that too many Americans have an erroneous view of the revolutionary terrorist.

"I fear many people sec them as a caricatured comical figure, a bearded, rumpled individual furtively clutching a round bomb with fuse sputtering," the FBI chief continued. "It would be folly to confuse this invention of some cartoonist's mind with the true revolutionary terrorist. He is not amusing. He is lethal. And Americans simply must realize this."

Kelley said that indifference or even assistance by third parties adds to the already extreme difficulty of apprehending suspected terrorists. "Incredibly, some otherwise law-abiding people provide moral and material support to terrorists, apparently for idealistic reasons . . . Terrorists are not idealists. They are without principle. They have no regard for human life. They pervert the freedoms this nation bestows upon its citizens . . . They are not political activists; they are criminals. And their numbers seem to be growing."

The attorney general for California, Evelle Younger, whose state has been rocked by terrorist violence from such groups as the Symbionese Liberation Army (SLA) and the Charles Manson gang, made the same point in a U.S. Senate hearing in 1974. "....It is perfectly obvious that the SLA types wouldn't be at large today unless they were able to locate and identify and take advantage of certain friendly acts," Younger testified.

"In the old days," Younger continued, "John Dillinger or

"In the old days," Younger continued, "John Dillinger or Preity Boy Floyd had a limited number of people they could turn to for help when they were being sought by the authorities, but obviously, the situation today is different. There is no other way to explain the success that some of the SLA people and others have had in avoiding capture over a long period of time."

FBI searches for light to cast on the shadow of terrorism

WASHINGTON-Clarence M. Kelley, the FBI director, is a big man and he son; the late director issued sweeping perspired during the question-and-answer period after lunch here this week at the American Security Council.

One reason for the wet brow was the heat of the television camera lights focusing on the lectern. But another was the ticklish subject of the directorgrowing terrorism in the United States. Bombs in airport lockers, senseless violence against the innocent.

Kelley deplored these acts and vowed that his vast organization would take every "legal" step to arrest the guilty; he urged citizens to come forward with information to hopefully head off disaster in the future.

The director was very careful to avoid the appearance of being an alarmist, or even as, an advocate for more stringent ceived by the public." ration seemed to be coming out of the past-not his, but from the Hoover era of wiretaps and gang busting.

Yet, here he was, out in public, answer. States. ing questions from the right and left.

Hoover almost never went public in perstatements through aides. Often, "white papers" without letterheads came from Hoover's FBI to select news organiza-

Not once did Kelley mention Hoover. But he did point out that he has been ... FBI director 21/2 years now and spent 12 years as the chief of police in Kansas City. And with the pride of a cop, Kelley said he was "yery satisfied" with the skills and capabilities of the "fine [FBI] 'organization."

At the same time, Kelley pointed out that the acts of terrorism are a new kind of threat in this nation. He suggested that because this activity has been 3 scattered across the nation "the total impact of this activity is not easily per-

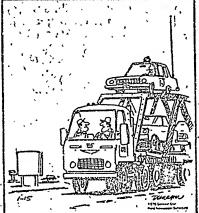

laws aimed at coping with mad bomb-. Kelley observed "we are dealing for ers. Indeed part of his brow of perspi- the most part with small, closely knit, Kelley observed "we are dealing for '. clandestine groups difficult to penetrate. ing citizens provide moral and material- for human life. They pervert the free-They defile American traditions. They criminals. And their numbers seem to be growing."

The director said he didn't think the nation is in "imminent danger of being," devastated by terrorists, but I do consider er terrorism a very real and growing problem."

Kelley attributes 89 bombings to tere rorists last year, compared with 45 in ! 1974. He says during the past five years there have been 255 such bombings, 122 4 firebombings, 45 sniping incidents, 120% shootings, 24 ambushes, and 21 arsons.

Since 1971, the director said, 43 police men have been killed and another 152 ? wounded in terrorist-linked acts.

So far, however, Kelley observed, there has not been an "avalanche" of people coming forward with information! for law enforcement agencies in cases of terrorism. He suggests it would be well. if the public would help-before such acts reach crisis intensity.

"Everything we possibly can within the parameters of the law is being done." the FBI chief added.

WAYNE, MICH. EAGLE -D. 12.492-**DETROIT METROPOLITAN AREA**

JAN 22 1976

By TOM OCHILTREE **Panax Washington Bureau**

Up until now all the pros and cons voiced about detente by members of Congress and presidential candidates largely have overlooked one worrying problem. The more relaxed relationship with the Soviet Uhion has placed a eavy security burden on the Federal Bureau of Investigation (FBI).

In matter of fact tones, FBI Director Clarence M. Kelley startled a roomful

of newsmen recently by discussing the dangers of spying and subersion.

He pointed out that the embassy staffs, trade delegations and cultural representatives from the Soviet bloc countries now total about 2,000 persons in the Washington area alone..' The startling fact is that this figure has tripled in

Additionally, about 50,000 from the Soviet-dominated world visit the United States each year. They are of all types — scientists, ballet dancers, sailors and just plain tourists.

To prevent espionage and subversion the FBI is charged with keeping a watch on the more suspicious seeming of these visitors.

Kelley said some of these people presumably are fulltime agents of the KGB, the Russians dread secret police and spy apparatus. Others may be parttime agents or just report occasionly on things they have observed in the United States.

In any event 'a substantial threat exists in this area," he said.

Occasionally a sensational story surfaces in the media reporting that KGB agents actually have penetrated the offices of senators and congressmen and the staffs of congressional committee.

Kelley threw down those stories. He said the FBI "knows of no intrusions on Capitol Hill."

While he avoided making the point specifically, his audience knew the additional burden on the FBI comes at a time when congressional committees, in the name of protecting the civil liberties of Americans, continue to badger the granger for over realess, activities in the nase including questionable use of agency for over zealous activities; in the past including questionable use of

Kelley insisted that the FBI is determined from now in to stay strictly within the law when it comes to the rights of citizens. He and Atty. Gen. Edward H. Levi are carrying on a continuous consultation designed to produce rules for the EPI which will a generalish the difficult took both of produce rules for the

Hevi are carrying on a continuous consultation designed to produce the set of the FBI which will accomplish the difficult task both of protecting the freedoms all Americans cherish and safeguarding society from people seeking to destroy it. He said the FBI would like Congress to relay somewhat the severe restrictions which now make it extremely difficult for the agency to use one of its major tools — wire tapping and deployment of microphones and other electronic devices to pick up convergations. Thus far there has been no response tronic devices to pick up conversations. Thus far there has been no response

Kelley spoke at a luncheon organized by the American Security Council, a private body, in Washington's Army and Navy Club.

Much of his speech was devoted to the growing worldwide threat of terrorism. Kelley reminded Americans that when they read about "the bloody atrocities in Northern Ireland, the Middle East and elsewhere" it would be well for them to reflect that "there has been strong evidence in the past couple of years that our own terrorist problem is growing." He cited these statistics:

There were 89 bombings attributable to terroritsts activity in our nation

last year, as compared with 45 in 1974 and 24 in 1973.
—"During the past five years there have been 255 such bombings, 122 fire

bombings, 45 sniping incidents, 120 shootings, 24 ambushes and 21 arsons."

American terrorists may be influenced by extreme radical political ideas from abroad but the FBI has not found proof that the groups here were being

manipulated by the KGB or some other foreign intelligence service, he said.

Kelley described terrorism as "the ultimate evil." Terrorists kill and maim innocent men, women and children but their activities, in the long run, retard rather than advance political ideas in which terrorists believe, he said, adding that he has only contempt for people who support terrorist activities of any that he has only contempt for people who support terrorist activities of any

"Incredibly, some otherise law-abiding people provide moral and material support to terroists, apparently for idealistic reasons," he said. "The best that can be said about such people is that they are terribly misguided.

"Terrorists are not idealists. They are without principle. They have no regard for human life. They pervert the freedoms this nation bestows upon its citizens. They defile American traditions. They are not political activists. They are criminals and their numbers seem to be growing."

Kelley Warns o Increased Terror Affacks in U

BY DAVID LAMB Times Staff Writer

WASHINGTON-FBI director Clarence M. Kelley warned Tuesday that random terrorist attacks in the United States were growing at a record rate and said some radical groups might be planning increased violence during the bicentennial year.

Kelley, who called terrorism "the ultimate evil in our society," said the FBI had received intelligence reports about radicals' plans and, although hard evidence was lacking, the reports must be taken seriously.

"Some might think we are crying wolf," Kelley said. "That's entirely wrong . . . I am not saying that our nation is in imminent danger of being devastated by terrorists. But I do consider terrorism a very real and graying problem." growing problem.

He told luncheon guests at the American Security Council, a private organization of 150,000 members interested in defense and national security, that there were 24 terrorist bombings in the United States in 1973, 45 in 1974 and 89 last year.

Excluding the 11 persons killed in the still-unsolved explosion at La-Guardia Airport in New York City last month, terrorist acts of violence killed 11 persons in 1975, injured 72 and caused \$2.7 million in property damage.

During the last five years, Kelley said, there have been 255 terrorist bombings in the United States, 122 firebombings, 45 sniping incidents, -120 terrorist shootings, 24 ambushes and 21 instances of arson. At least 43 police officers have been killed and 152 wounded by terrorists in the same period, he said.

Saying that the FBI still did not know if the LaGuardia blast was the work of a madman or a revolutionary, Kelley told the council that chances of solving terrorist crimes were relatively small, largely because violence-prone révolutionaries are part of small, closely knit groups that are difficult to infiltrate.

Kelley, who stressed the importance of surveillance and intelligence. work "within the parameter of law," said there was no evidence that any of the terrorist groups responsible for recent bombings in the nation were financed or controlled by foreign in-

ierests. But, in an unrelated comment, he said that the Soviet Union's intelligence gathering agency, the KGB, posed a "substantial threat" in the United States.

LOS ANGELES. CAL. HIGHLAND PARK NEWS HERALD & JOURNAL. WEEKLY

JAN 2 4 1976 Byllder

-'Ultimate evil'-

Terrorism is a growing menace

Director of the FBI Clarence Kelley in an address before the American Security Council on Jan. 13 called on the American public to help combat terrorism which Kelley termed "the ultimate evil in our society."

"The terrorist neither listens to reason nor engages in reasoning with others," Kelley said. "His aim is to generate fear—to frighten people into submission. He measures success by the magnitude of the fear he generates through brutal, savage acts of violence."

The history of terrorists in recent years bears out the validity of Kelley's concern. There were 89 bombings attributable to terrorist activity in the nation last year, as compared to 45 in 1974 and 24 in 1973.

During the past five years there have been 255 such bombings, 122 firebombings, 45 snigning incidents, 120 shootings, 24 ambushes and 21 arsons. Eleven persons were killed in terrorist acts of violence in 1975 and 72 people were injured. Property damage amounted to more than \$2.7 million.

Combatting the terrorist is an exercise in frustration to law enforcement officials. The terrorist is an amoral animal, prepared to kill men, women and children to further whatever cause he claims to be pursuing. The heinousness of these murders is accented by the fact that they murder without passion but with cool deliberation and careful planning.

Even when terrorists are identified, they are not easily captured. Terrorists constitute a small, closely knit, clandestine group which is difficult to penetrate. They are expert in preparing false identification and are able to lose themselves in a subculture of communes that span the nation.

Terrorism is growing and no one is immune to the utterly senseless violence generated by those who espouse this or that cause. Americans can help combat the terrorist by recognizing his true nature and by supporting law enforcement in its efforts to rid society of the death merchants.

While the terrorist can kill and destroy, he can never win. Only the terrorist is unaware that his mindless act can only strengthen Americans' resolve to preserve the democratic system that has served us so well these two centuries.

Kelley, emphasized terrorist activity was the "ultimate evil" in the United States; but said few Americans are concerned until their lives are involved.

He said there were 89 bombings attributable to terrorist activity in the United States last year, up from 45 in 1974, and 24 in 1973.

Such activity killed 11 persons and injured 72 others last year and brought property damage to more than \$2.7 million.

"I'm not saying that our nation is inimminent danger of being devestated by terrorists," he said. "But I do consider terrorism a very real and growing problem."

'Ultimate evil'

Terrorism is a growing menace

Director of the FBI Clarence Kelley in an address before the American Security Council on Jan. 13 called on the American public to help combat terrorism which Kelley termed "the ultimate evil in our society."

"The terrorist neither listens to reason nor engages in reasoning with others," Kelley said. "His aim is to generate fear—to frighten people into submission. He measures success by the magnitude of the fear he generates through brutal, savage acts of violence."

The history of terrorists in recent years bears out the validity of Kelley's concern. There were 89 bombings attributable to terrorist activity in the nation last year, as compared to 45 in 1974 and 24 in 1973.

During the past five years there have been 255 such bombings, 122 firebombings, 45 sniping incidents, 120 shootings, 24 ambushes and 21 arsons. Eleven persons were killed in terrorist acts of violence in 1975 and 72 people were injured. Property damage amounted to more than \$2.7 million.

Combatting the terrorist is an exercise in frustration to law enforcement officials. The terrorist is an amoral animal, prepared to kill men, women and children to further whatever cause he claims to be pursuing. The heinousness of these murders is accented by the fact that they murder without passion but with cool deliberation and careful planning.

Even when terrorists are identified, they are not easily captured. Terrorists constitute a small, closely knit, clandestine group which is difficult to penetrate. They are expert in preparing false identification and are able to lose themselves in a subculture of communes that span the nation.

Terrorism is growing and no one is immune to the utterly senseless violence generated by those who espouse this or that cause. Americans can help combat the terrorist by recognizing his true nature and by supporting law enforcement in its efforts to rid society of the death merchants.

While the terrorist can kill and destroy, he can never win. Only the terrorist is unaware that his mindless act can only strengthen Americans' resolve to preserve the democratic system that has served us so well these two centuries.

Among the celebrants

FBI Director Clarence Kelley's recent warning that terrorists may be among the celebrants at America's Bicentennial should be of serious concern to every innocent citizen. Kelley warns that such groups may be preparing to "blow out the candles" on what otherwise promises to be a memorable and fulfilling epoch in our nation's history.

"We have had utterances from some groups that they are going to disrupt the Bicentennial," said Kelley. "One such group, in their constitution, said they are going to kill me," he added.

Speaking at a Washington luncheon sponsored by the American Security Council, Kelley's main point, however, is that most citizens fail to take seriously enough the threat posed by terrorists to our society. That lack of perception persists, he adds, even as the carnage from terrorist acts in the U.S. mounts. Bombings from terrorist activity doubled in each of the past two years; going from 24 in 1973 to 45 in 1974 to 89 in 1975. Such terrorists acts last year left 11 dead, 72 injured, and \$2.7 million worth of property damage.

"Still, I think to most Americans, the terrorist threat is a remote and abstract thing—a problem that commands little, if any, of their attention in their understandable pre-occupation with problems more immediate in the every day business of living," says Kelley.

A key problem in educating Americans to the danger, he adds, is the too common public view of the terrorist as a haphazard bearded bungler--rather than the deadly threat he really is. "Terrorists," says the director, "are prepared to kill men, women and children to further whatever cause they claim to be pursuing. And the heinousness of these murders is accented by the fact that they murder without passion. They murder with cool deliberation and careful planning." Despite this reality, adds Kelley, "incredibly, some otherwise law-abiding people provide moral and material support to terrorists..."

Kelley concedes that the FBI's success in identifying and bringing to justice perpetrators of terrorist acts is mixed at best. One problem is that the agency is not allowed to use electronic assists such as wiretaps to penetrate terrorist groups.

One obvious answer in aiding the FBI in our fight against terrorism is for Congress to pass legislation permitting the agency to use electronic surveillance in special circumstances. Beyond that, as the FBI chief emphasizes, individual citizens can help out by promptly reporting information relating to terrorism and by "vigorously supporting the principle of rule by laws that has enabled our nation to flourish these 200 years."

Gentlemen:

I would like to have some information on the AMERICAN SECURITY COUNCIL. I would like to know if it is a Communist Party? If it is aparty to over-throw our form of Government?

I am a member of this Party. I took it up with the local F. B. I. and they in turn sent sent my letter to the District F. B. I. in Houston. Texas, and in turn return my letter to the local office, and they in told me to write to you for fur ther information. It seems to that neither offices have heard of this organization.

Gentlemen:

I today received the enclosed letter in the mail, requesting me to return the questionnaire and to join the organization known as "The American Security Council". As I am a retired, regular Air Force officer, I am suspicious of such organizations and their aims and do not want to associate myself with them.

I would appreciate it if you would please advise me regarding this organization.

Dear

I am writing to express my appreciation for your presentation at our Soviet Studies Seminar. Our Intelligence Division staff and the Special Agents attending the seminar have told me that your lecture and discussion were informative, useful, stimulating and contributed significantly to the success of the seminar.

We hope that we can continue our dialogue with you and look forward to the possibility of similar, future sessions.

We are most grateful for your contribution.

Sincerely yours,

William H. Webster,

Supervisory Special Agent Federal Bureau of Investigation

Pennsylvania Avenue

Washington, D. C. 20535

I am enclosing some of the clippings we have collected since Mr. Kelley's appearance at our press luncheon. I am, as you can imagine, very pleased by the coverage the press gave his remarks. His message was important, and it deserved the play it received.

I want to thank you for your part in helping us to arrange for the Director's appearance. It is strange to me that F.B.I. spokesmen have to defend the agency's record on the public relations platform. But if it must, it must. I am glad we could be helpful in offering Mr. Kelley a useful platform.

Best regards,

EX-116

John M. Fisher
